npm

### Tools for Native Modules

Optionally install the tools necessary to compile native modules.

Some npm modules need to be compiled from C/C++ when installing. If you want to be able to install such modules, some tools (Python and Visual Studio Build Tools) need to be installed.

☒ Automatically install the necessary tools. Note that this will also install Chocolatey. The script will pop-up in a new window after the installation completes.

☐ Alternatively, follow the instructions at <https://github.com/nodejs/node/blob/main/windows/install.md> to install the dependencies yourself.

C:\Users\subha>n8n
User settings loaded from: C:\Users\subha\.n8n\config
Initializing n8n process
n8n ready on 0.0.0.0, port 5678

There is a deprecation related to your environment variables. Please take the recommended actions to update your configuration:
- N8N_RUNNERS_ENABLED -> Running n8n without task runners is deprecated. Task runners will be turned on by default in a future version. Please set 'N8N_RUNNERS_ENABLED=true' to enable task runners now and avoid potential issues in the future. Learn more: https://docs.n8n.io/hosting/configuration/task-runners/

Version: 1.92.2

Editor is now accessible via:
http://localhost:5678

Press 'o' to open in browser.

## 21 Choose the appropriate options

The screenshot shows a dark-themed web interface for customizing n8n. A central modal box titled "Customize n8n to you" contains five dropdown menus, each with a "Select..." placeholder and a downward arrow. The questions are: "What best describes your company?", "Which role best describes you?", "Who will your automations mainly be for?", "How big is your company?", and "How did you hear about n8n?". A red "Get started" button is at the bottom right of the modal. In the background, a sidebar with "Onboarding" and "Get started" tabs is visible, along with a blurred "In AI app" button.

Customize n8n to you
