Exercise Questions:

Use Quadratic AI to answer these business questions:

• Quantify the revenue loss attributed to undelivered orders.

• Identify customers with the most significant On-Time, In Full (OTIF) discrepancies.

• Determine product categories that exhibit low 'In Full' delivery rates.

• Calculate the average delay time for late deliveries.

• Identify product categories with the lowest 'In Full' delivery rates. What could this indicate about supply chain bottlenecks?

Put yourself in the stakeholder's shoes and try to provide additional insights that might benefit stakeholders.
